

Manuel Muñoz, MD, PhD

Perioperative Transfusion Medicine
School of Medicine
University of Málaga
Málaga, Spain

Manuel Muñoz is Professor of Perioperative Transfusion Medicine, School of Medicine, University of Málaga, Spain. Over the last 20 years, Professor Muñoz' research interests have focused on perioperative cell salvage (efficacy, quality, immunology, safety) and perioperative anaemia management (with special emphasis on the use of intravenous iron). He has published over 150 papers and chapters on these topics. He is also interested in the appropriate use of allogeneic transfusion and coagulation factor concentrates.

Professor Muñoz was the founder of the International Multidisciplinary Autotransfusion Study Group (GIEMSA) and a co-founder of the Anaemia Working Group España (AWGE). He is currently member of NATA's Board of Directors, coordinator NATA's Anaemia subcommittee, vice-coordinator of the "*Spanish Consensus Document on Alternatives to Allogeneic Blood Transfusion*" (Seville Document) expert panel and coordinator of the educational platform www.deficitdehierro.com.

He is also member of several Spanish Scientific Societies, as well as the European Academy of Sciences and Arts, and belongs to the Editorial Board of *Blood Transfusion*, *Revista Española de Anestesiología*, and *Medicina Intensiva*.
